1.2	Demo	1
1.3	Installation	1
1.4	Configuration	2
1.5	Advanced topics	2
1.6	Troubleshooting	4
1.7	Credits	4

WordPress look and feel for Django administration panel.

1.1 Features

- WordPress look and feel
- New styles for selector, calendar and timepicker widgets
- More responsive (admin panel should look fine and be usable on displays with minimum 360px width)
- Editable top menu
- Optional fully configurable left menu
- Left menu can be pinned (fixed CSS position) or unpinned and collapsed or expanded
- Awesome [Font Awesome](#) icons supported in both menus
- Multiple AdminSite's support with possibility to have different menus, colors and titles for each one
- 7 additional color themes included
- Collapsible fieldsets can be opened by default

1.2 Demo

Try `test_project` [here](#) or download [django-wpadmin](#) from GitHub and run it on your own machine. `test_project` contains SQLite database file with prepopulated sample data.

1.3 Installation

- Install `django-wpadmin` from [PyPI](#):

```
pip install django-wpadmin
```

- Or from [GitHub](#):

```
pip install git+https://github.com/barszczmm/django-wpadmin.git#egg=django-wpadmin
```

1.4 Configuration

- Add `wpadmin` to your `INSTALLED_APPS` before `django.contrib.admin`:

```
INSTALLED_APPS = (  
    # Django WP Admin must be before django.contrib.admin  
    'wpadmin',  
)
```

- Add `django.core.context_processors.request` to `TEMPLATE_CONTEXT_PROCESSORS` setting.

1.5 Advanced topics

1.5.1 Advanced configuration

Available options

Creating custom menus

Color themes

1.5.2 Changes in Django's ModelAdmin behaviour

Ignored ModelAdmin options

Some options of Django's ModelAdmin are ignored when Django WP Admin is used:

ModelAdmin.actions_on_top Actions and pagination are always visible above objects lists.

ModelAdmin.actions_on_bottom Actions and pagination are always visible below objects lists.

ModelAdmin.save_on_top Save buttons are always displayed at the bottom of the page.

Additional ModelAdmin options

There is one additional class for fieldsets: `collapse-opened` - it tells Django to create collapsible fieldset but opened but default.

1.5.3 Translations

If you want to help to translate this software please join me on Transifex: transifex.com/projects/p/django-wp-admin/

Here is a list of available translations.

English

Source (default) language.

1.5.4 Changelog

v1.6.1 (2014-03-13)

- Python3 compatibility
- updated templates for password reset and change (from /registration template path)
- updated template for login page to make it more consistent with rest of the pages
- fixed bug with submenu when left menu is folded
- more fixes for small resolutions screens
- proper login forms in test project used

v1.6.0 (2014-03-11)

- **backward compatibility breaking release!**
- most of things was rewritten
- from now on there will be separate branch for each major Django version and Django WP Admin will be versioned according to Django version it supports...
- ...so this version is compatible only with Django 1.6.x
- all JavaScript libraries updated
- FontAwesome updated to version 4.0.3
- new WordPress admin look
- styles for selector widget
- styles for calendar widget
- styles for timepicker widget
- styles for delete confirmation page
- styles for history page
- collapsible fieldsets can be opened by default
- support for nested submenus
- 7 additional color themes added
- added licenses for all included external files (fonts and JS)

v0.2.0 (2013-04-02)

- styled object's editing pages

v0.1.2 (2013-03-23)

- **Django 1.3 support dropped!** (there's too much differences between Django 1.3 and 1.4)
- installation process slightly changed (there's no need to copy or symlink base.html file for specific Django version)
- added WordPress look and feel for objects lists (change_list.html)

- CHANGELOG added

v0.1.1 (2013-03-19)

- installation scripts
- README and LICENSE files added

v0.1.0 (2013-03-19)

- top and left menu

1.6 Troubleshooting

Please create an [issue on GitHub](#) if you have any problems or requests.

1.7 Credits

Python code is based on [django-admin-tools](#) app.

WordPress look and feel is of course inspired by [WordPress](#).

Included icons comes from [Font Awesome](#).
